

Tarun Mittal

Senior Software Engineer

(+91) 9001542418 | tm.eng2021@gmail.com | [linkedin.com/in/t-mittal](https://www.linkedin.com/in/t-mittal) | github.com/TM-DEV-PRO | Bangalore, India

SUMMARY

- Senior Software Engineer with **5 years of experience** designing and owning cloud-native, high-throughput distributed systems.
- Expertise in **Java and Spring Boot microservices**, Hibernate / J2EE patterns, event-driven architectures, and **Python for Agentic AI and RAG systems**.
- Proven track record shipping **production systems**, leading backend migrations, and improving reliability, performance, and scalability.

SKILLS

- Languages:** Java, SQL, Python, Go (Golang), C, C++, Rust.
- Backend & APIs:** Spring Boot, Spring MVC, Spring WebFlux, Spring Security, Hibernate, JPA, Jakarta EE (J2EE), REST, gRPC, Spring Batch.
- AI & Agents:** Python (FastAPI, LangGraph, LangChain), LLM agents (OpenAI/Gemini/Claude), MCP, RAG, text-to-SQL, pgvector, ChromaDB.
- Streaming & Data:** Apache Kafka, Apache Flink, Apache Spark, Apache Pinot, ClickHouse, BigQuery, DuckDB.
- Databases & Storage:** PostgreSQL, MySQL, Redis, MongoDB, Cassandra, Elasticsearch, Amazon S3.
- Cloud & Infrastructure:** GCP, AWS, Docker, Kubernetes, Git, CI/CD, Maven, Observability (ELK, Grafana, New Relic, Sentry).
- Core Engineering:** Data Structures & Algorithms, System Design (HLD/LLD), Concurrency, DBMS, Operating Systems, JUnit, Mockito.

PROFESSIONAL EXPERIENCE

Senior Software Engineer IMPACT ANALYTICS, Bangalore June 2026 – Present

Agentic AssortSmart (AI Powered Retail Merchandise Planning Platform)

- Building the agentic rebuild of AssortSmart, a merchandise planning SaaS where retailers decide what to buy, how much, and for which stores, with AI agents drafting store clusters and plans for planner review, override, and approval.
- Developing the **agentic microservice (Python, FastAPI, LangGraph)** whose conversational agent grounds plain language requests into store and season scopes, batch evaluates **100 silhouette scored candidate clusterings**, and presents the **top 3 with evidence** for human approval, cutting turnaround from days to **under 1 hour**.
- Designing the core backend as **Spring Boot (Java) microservices** covering plan lifecycle, tenant configuration, and bulk save REST APIs, with worker pools for concurrent writes, timeouts, and JWT auth via **Spring Security**.
- Led the design of the per tenant **ClickHouse** planning store on an **append only, never erase write model** where facts land as atomic partition swaps and every decision is an insert resolved via latest state views, enabling version diff, undo/redo, lock free writes, and a full audit trail.
- Tech Used:** Java, Spring Boot, Hibernate, Python, FastAPI, LangGraph, MCP, ClickHouse, PostgreSQL, Redis, Kafka, GCP, Docker.

Software Development Engineer 2 UBER (via EPAM Systems), Bangalore July 2024 – May 2026

Financial Risk Management (FRM) Scoping Platform (Uber Finance)

- Cut Uber's quarterly financial risk-scoping cycle time by **70%** by replacing a manual Google Sheets workflow with a Spring Boot and MySQL platform serving **36 REST endpoints across 8 screens**, with output feeding PwC audit work papers.
- Designed an **8-table normalized MySQL schema** whose quarterly ETL aggregates **19M+ general-ledger rows into 300K rows**, reconciled against public 10-Q filings.
- Migrated raw JDBC access to **Spring Data JPA / Hibernate**, fixing a latent column-aliasing bug and raising changed-module test coverage to **100%**.
- Tech Used:** Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Redis, Maven, JUnit.

Menu Ingestion & Automation Platform (Uber Eats)

- Built an event-driven ingestion pipeline using **Kafka, Apache Flink, and Apache Spark** that processes **30,000+ vendor menus per month**, cutting onboarding from 24 hours to 2 hours and saving **\$600K+ annually**.
- Built an AI extraction pipeline with **RAG and Gemini** converting PDF and image menus into schema-validated catalog data with **98% fidelity**.
- Increased successful ingestions by **95%** using IP rotation and dynamic proxy pools, and built ingestion health dashboards on **Apache Pinot**.
- Tech Used:** Java, Spring Boot, Python, Apache Kafka, Apache Flink, Apache Spark, Apache Pinot, Selenium, Gemini, GCP, Docker.

Software Development Engineer 2 MASTERS INDIA, Noida December 2022 – June 2024

GST Compliance & E-Invoicing Platform

- Led the migration from a PHP (Laravel) monolith to asynchronous **Java (Spring Boot / WebFlux) microservices**, mentoring junior engineers through the rollout and cutting p95 API latency from **1.2s to 300ms** for 2,500+ enterprise clients.
- Scaled bulk e-invoice processing to **100,000+ transactions per import and 1M+ daily transactions** with Spring Batch workers and idempotent retries.
- Set up centralized **ELK logging and New Relic monitoring with alerting**, cutting incident triage time by 70%, and raised test coverage from **35% to 82%** with JUnit automated tests gating CI/CD releases.
- Tech Used:** Java, Spring Boot, Spring WebFlux, Hibernate, PostgreSQL, Redis, Spring Batch, Docker, ELK, New Relic, AWS.

Software Development Engineer GEEKSFORGEEKS, Noida August 2021 – November 2022

- Redesigned and migrated the backend from PHP to **Spring Boot (Java)**, improving reliability for **100,000+ daily queries**.
- Designed data models and REST APIs for voting and pinning features, increasing **premium subscription sales by 15 to 20%**.
- Tech Used:** Java, Spring Boot, Spring MVC, Hibernate, MySQL, Redis, REST, Cron, AWS.

EDUCATION

B.Tech (Information Technology) Institute of Engineering & Technology, Lucknow July 2017 – June 2021

ACHIEVEMENTS

- Ranked **2260 out of 37,000+** participants in the Google Code Jam Qualifier Round 2021.
- Finalist at the **Smart India Hackathon 2020 (MHRD)**, securing a top 3 position nationally.
